

**KEY FACTS**

- Asexual: 1 parent, identical offspring (clones), mitosis, fast
- Sexual: 2 parents, varied offspring, meiosis + fertilisation
- Asexual advantage: fast, stable environment. Sexual advantage: variation.

**KEY TERMS**

<b>Asexual reproduction</b>	One parent, clones, mitosis
<b>Sexual reproduction</b>	Two parents, varied offspring, meiosis

■ EXAM TIP: Asexual = fast/no variation. Sexual = slow/variation. This trade-off is the usual answer.
